This is very important! Please read!

Dear MRC-PRO counter customers,

The MRC-PRO counters have different settings for applications of limit switch, 2-wire proximity or 3-wire proximity switches. **A counter that pre-set for a limit switch will not work for a proximity switch a vice versa. A Counter that is preset for 2-wire proximity will not work for a 3-wire proximity sensor and vice versa.** So if you want to change the type of sensor you are currently using, you will need to re-set up your counters. The best way is to send the counters back to us. Let us reset it for you.

Please call us at: 203-327-3649 if you have any questions!

Thank you for choosing Sysdyne's products.

Sincerely,

Sysdyne
